

Real veneer edges in continuous rolls

produced from more than 50 wood species in 8 different quality-grades

technical treatments:

fleece-backing thin / thick / twice and D4 water-resistant

sanding 0,30 mm - 0,50 mm

pre-finished lacquered (for softforming too), stained according to colour matches
primer, anti-splitting protection, PVAc-pre-coating and hot-melt pre-coating

Reconstituted veneer edges in continuous rolls

more than 30 standard designs can be delivered from stock (in special widths too)

technical treatment similar to real veneer edges

individual adjustment of a design is possible

Thick veneer edges in continuous rolls

surface sanded

rough backing supports adhesive strength

priming or hot-melt pre-coating

up to 1,5 mm pre-finished lacquered too

approx. 1,0 mm: 2 layers

approx. 1,5 mm: 3 layers

approx. 2,0 mm: 4 layers

approx. 2,5 mm: 5 layers

approx. 3,0 mm: 6 layers

Profile wrapping veneers

in more than 50 wood species and different grades

special highly flexible lacquers are available

water resistant fleece-backings are possible

3D-veneer processing

for the automotive industry and other special use

wavy veneers can be laminated, too

sanding and flexing if requested
